How you can secure your devices:

- **Add** the ScamShield app to detect scam messages and block scam calls.

- **Install** anti-virus apps to enhance protection against malware and malicious phishing links.

- **Only use** app stores such as Google Play Store (Android) or Apple App Store (iOS), as these platforms have measures in place to detect and remove malicious apps.

- **Stick** to well-known app developers, check the number of downloads and user reviews.
